DETAILED ACTION

1. The amendment filed March 11, 2003 has been received and entered.
2. Claims 1-10 have been cancelled.
3. Claims 11-29 have been added. This restriction requirement is based on the new claims.

Election/Restrictions

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

A) specific carrier material composition selected from one or more of zeolite, calcium carbonate, magnesium carbonate, vermiculite, sawdust, small particles of wood, potting soil, peat moss, topsoil, limestone, small particles of rock, sand, sodium bicarbonate, activated charcoal, crushed seashells, silica, psyllium husks, wax, corn starch, salt, clay, talc, magnesium stearate, natural sponge, seeds, grains, ground corncob, gypsum, straw hay, or mulch;

B) specific animal product composition selected from one or more of urine, feces, or glandular secretions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for each of A and B for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 11-13, 16, and 17 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1654

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
